DETAILED ACTION***Information Disclosure Statement***

The references cited in the specification have been considered, but will not be listed on any patent resulting from this application because they were not provided on a separate list in compliance with 37 CFR 1.98(a)(1). In order to have the references printed on such resulting patent, a separate listing, preferably on a PTO/SB/08A and 08B form, must be filed within the set period for reply to this Office action.

Specification

The disclosure is objected to because of the following informalities: The listing of disclosure documents 512686, 623794, and 535992 needs to be specified on what these documents really are.

Appropriate correction is required.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 3713

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 1 is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6443841. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 1 of the application discloses the same method taught in claim 1 of Rossides.

Regarding the limitation of "at least two products being compared... product contest", Rossides shows this limitation since the mere art of betting on anything inherently compares multiple products, such as comparing a field of racing horses or comparing two sports teams competing amongst one another.

Claim 1 is provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1 of copending Application No. 10442794. Although the conflicting claims are not identical, they are not patentably distinct from each other because both claims disclose the same invention and the claim language does not distinguish one from another.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Rossides (US Patent #5575474). Rossides discloses a method for operating a computer database system comprised in combination of the following processes (col. 7, 20-23): (a) a process for creating a bet: defining a contest between one or more products, defining a comparison process for judging the contest, said comparison process defining possible comparison outcomes (col. 9, 42-50), iii. defining bet transaction rules for risking money on the outcome of the contest (col. 9, 54-60), (b) a process for finding and viewing the bet contest (col. 8, 52-60), (c) a process for making bet offers for risking money on the contest (col. 8, 61-65), (d) a process for matching up bet offers (col. 8, 52-60), (e) a process for triggering the judging of the contest (col. 12, 25-38), (e) a process for judging the contest (col. 12, 44-55), (g) a process for dividing money risked in the contest according to the result of said judging, and according to said bet transaction rules (col. 13, 5-12), (h) whereby, viewers of the betting on the contest, and of the result, if any, of the contest obtain valuable information for comparing the products in said contest (col. 4, 16-20).
